January 16, 2021

To Whom It May Concern:

GNU social is pleased to inform you that Eliseu Amaro has successfully completed GNU social Summer of Code 2020, a program which connects students with mentors for 3 months to contribute on GNU social. Each year many students apply to participate with only a portion of them being accepted into the program, and not every student finishes the program successfully.

Eliseu was accepted into the program by, and developed free source software for, GNU Project beginning March 31, 2020 and ending on August 24, 2020. Over that period, they passed each of the three evaluations conducted by their mentors[1] with the final grade of 42, 1337, and 1337, respectively[2]. Their contributions consisting of 584 hours of workload are in the field of Web Technologies, Accessibility and Design.

More information on Eliseu's project can be found at:
https://go.diogo.site/gsoc2020_v3_fe

They received a stipend of 3000 USD for the project in the form of charitable donations from The Freaks Club. Eliseu was not directly employed by GNU or The Freaks Club during GNU social Summer of Code 2020. Eliseu worked from home on their project and was not required to visit either GNU Project or The Freaks Club's offices.

You can learn more about the program on our website at https://go.diogo.site/gsoc2020. Should you require any further information, please do not hesitate to contact our team via IRC at #social@irc.freenode.net .

Happy hacking,

Diogo Peralta Cordeiro
GNU social Summer of Code Program Manager
